With a feather-light outsole	For especially wide feet	For narrow feet	For gentler walking	For sensitive feet	For pain-free walking	For diabetic foot syndrome	For a super-soft feeling
FinnRelax	FinnPlus	FinnSlim	Finnamic	FinnStretch	Prevention Shoes	FinnOrtho	FinnMellow

THE RIGHT STANCE

Our physical wellbeing is very dependent on how well our feet are supported. The correct support affects more than just our posture and gait; it influences our whole body. This means that unique development and production techniques are required for all different types of feet. A key part of our work at FinnComfort® is to look in detail at different types of feet and to develop shoes that fit perfectly and feel great. Therefore, we are always guided by the needs of our customers and continuously work to improve all our products.

FINNSLIM

Extra-narrow fit

The extra narrow cut pampers delicate feet through optimal comfort. These models are suitable for those who walk on narrow feet.

The narrow cut of the shoe and footbed offers an optimal fit and foothold – so even dainty feet can walk safely and comfortably.

CASERTA

FINNSOFT

Some like it soft

WITH THE FINNCOMFORT® SOFT FOOTBED

The soft footbed, a cushioned, super comfortable footbed, features an extra layer of foam. This long lasting material consisting of resilient memory foam promises a very soft step.

It is ideal for sensitive feet because the entire body weight is gently absorbed at every step.

ALEXANDRIA

FINNRELAX

Out and about in comfort

These models are impressive for the remarkably light weight of their outsoles. The lightness is achieved through the "EVA" material, with millions of tiny air chambers. The excellent cushioning guarantees extraordinary walking pleasure with each step.

BARLETTA

FINNSTRETCH

MORI

For particularly sensitive feet

Soft materials, shock absorbing outsoles and a padded footbed let you stand and walk comfortably and can help meet your special orthopaedic needs. Special consideration is given to the needs of those suffering from arthritis and diabetes. For example, the shoes offer plenty of room for the toes. The width of the forefoot is generously cut and the hold of the heel is very secure, ensuring optimal guidance for your foot.

FINNAMIC

Walk comfortably

Our feet are the part of the body that takes the most punishment. They carry our entire weight and are constantly stabilizing the body's center of gravity. Finnamic's rockered heel design encourages gentle and low-impact heel strike and effortlessly guides the motion impulse from the lateral foot via the medial fore-foot to the big toe. The broad, flat and stable mid-section may relieve unnecessary strain on the foot while stabilizing the body. Finnamic provides optimum balance and fit.

YUMA

Rockered soles for gentle and cushioned walking

Wide and flat mid-section for secure and relaxed standing

Rockered forefoot section encourages a natural heel-to-toe rolling motion

FINNPLUS

ROYAN

Extra-wide fit

The extra-wide cut gives wider feet a pleasant amount of space. The shape of the shoe and footbed is designed so that the shoe is very comfortable despite the greater amount of free space. For a perfect fit and safe walking.

FINNMELLOW

NEW

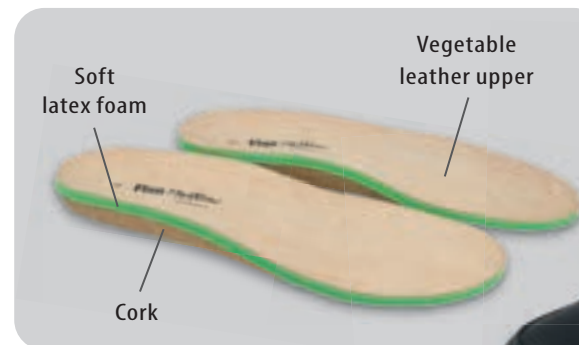

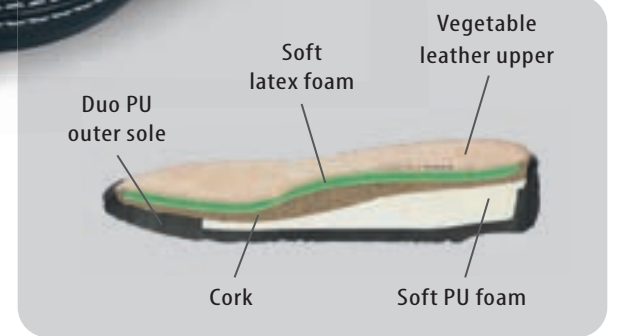

A super soft feeling

The innovative technology of FinnMellow features dynamic cushioning and outstanding pressure distribution, ensuring the ultimate in comfort for both men and women. The sole is extremely flexible, elastic and highly resilient, and acts as a shock absorber. The FinnMellow soft footbed, with its stabilised cork heel cup, is modelled on the anatomy of the foot, and allows the weight of the body to be evenly distributed over the entire sole of the foot. Additionally, the padding material has a cushioning effect on the foot, which provides the joints with relief and can prevent or mitigate pain in the joints and feet. The vegetable-tanned leather of the upper ensures a healthy climate for the feet.

If required, the foot bed can be replaced with an individual orthopaedic insole.

GRENADA

CANVEY

PRATO P. 45

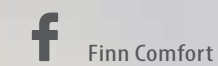

Over recent years, the subject of health has evolved from a major trend into a fundamental value, and, for some people, even into a life goal. The pandemic has once more heightened the desire for physical and mental balance. Scientists whose work focuses on fighting diseases and maintaining physical and mental well-being are attracting a great deal of attention from the media. Health is being regarded more and more in holistic terms: symptoms are no longer being considered in isolation from each other. The aim is, step by step, to harmonise all the influencing factors – from physical to mental balance, through to the environment and the workplace.

In order to be adequately prepared for these steps and, ultimately, to be in good standing with ourselves, our most fundamental tools – our feet – must be given the best possible treatment.

We at FinnComfort® have made it our mission to take the strain off our daily companions (and pathfinders) and to preserve their mobility and health. We work **together with podiatrists and experienced makers of orthopaedic shoes**, researching the anatomy of the foot and the way it works, and we have been developing super-comfortable, **high-quality footwear for over 75 years**.

Due to their special fits, beds and materials, our shoes have been proven to promote **healthy feet**, which is why our designs were officially given the status of medical devices last year. We manufacture a wide range of fashionable and classic models ourselves in our state-of-the-art factory in Haßfurt am Main – from design to production, through to strict inspection. The majority of our FinnComfort® shoes are **hand-stitched**; a quality that is valued by customers from all over the world.

On our social media channels, we network with customers, specialist retailers and people who take an in-depth interest in the subject of foot health. We give glimpses of what happens behind the scenes in our company, and provide a creative showcase for our designs. Of primary importance is a direct interchange with you: which models do you particularly like, what colour have you always wanted, what is your favourite insole? Tell us about your experiences – we look forward to hearing from you.

Ralph Wolter
Managing Director and Co-Owner of FinnComfort®

Insoles

The Super Comfort Footbed

The anatomically-shaped Super Comfort Footbed enhances the natural heel-to-toe rolling motion via the heel, lateral foot, medial forefoot and big toe.

The all-natural Classic Comfort Footbed may be removed overnight for airing. It can also be hand washed with mild soap and warm water (30°C / 86°F). It can be replaced with customised/orthopaedic insoles.

The Reflex Zone Massage Footbed

The reflex zone massage footbed is like a little daily spa treatment. It provides a gentle massage for the sole of your foot. The reflex insoles are available as an optional extra for many product groups. Start by wearing them for five minutes a day, then gradually increase the time to as much as an hour a day (no more).

Reflex zone footbeds are **NOT** suitable for diabetics!

The Reflex Zone Massage Footbed can be replaced again with the Super Comfort Footbed. New footbeds can be obtained at any time from our specialist retailers.

Sustainably on the move

FinnComfort® shoes not only look good, they are also very comfortable to wear. This is partly thanks to the **natural materials selected** for the manufacturing of our shoes.

FinnComfort® only processes **high-quality upper leather from German or European tanners conscious of the environment and quality**, who guarantee water protection and the responsible use of chemicals as well as social aspects. The upper leather, which does not irritate the skin or the lungs, is guaranteed to be free from harmful preservatives (PCP), azo dyes and allergenic nickel compounds.

Renewable raw materials such as cork, jute and natural latex make up the main components of the footbeds, which offer outstanding breathability and an optimal environment for the feet with vegetabledanned leather. The use of chemical additives is avoided as far as possible. Shoe uppers and soles are mostly bound together using watersoluble adhesives. All soles are foamed CFC-free. This allows us to ensure a high level of comfort and a positive environment for the feet.

FinnComfort® has firmly embedded **active environmental protection and sustainable further development** of the company in its corporate principles. In light of growing demand, conservation of limited natural resources is a top priority. We go to great lengths to reduce shipping and to use state-of-the-art technologies in our factory to increase our energy efficiency. Sustainable innovation does not happen spontaneously, but rather as a result of closely integrating our employees and productively collaborating with our partners.

Sustainable Partnership

Those who expect the **highest quality materials and workmanship** need partners that follow similar values.

With the **Josef Heinen Leather Factory**, FinnComfort® has one of several experienced, **reliable partners** at its side. Remarkably, the Heinen family has managed to combine **traditional craftsmanship** with a **modern, resource-effective mentality**.

Over the **past five years**, the leather factory has **reduced its energy consumption by a remarkable 15 %** and **CO₂ emissions by as much as 50 %**. This was made possible by reducing their consumption of water, chemicals and energy.

Comfort – made in Germany

Quality comfort shoes from FinnComfort® are made in our factory in Haßfurt, a small idyllic town in Lower Franconia, close to Bamberg. In spite of enormous market pressure from low-wage countries, we have managed to hold onto our home location over the last 75 years.

The number one reason: Here we can properly ensure that the high-quality requirements we place on diligence in our manufacturing processes are reliably met. This means we can guarantee that only high-quality, natural materials are processed, mostly using traditional craftsmanship. Here we can put modern sustainability into practice in manufacturing processes.

The second reason for our loyalty to the location is just as important: We clearly recognise our responsibility as an employer in the region. We safeguard and create jobs in Germany, we are committed to our region, and we will continue to manufacture in Germany in the future. This is the only way we can guarantee that we actually produce shoes that we also feel good about.

In wet conditions SympaTex® is especially comfortable. Sheer, tear-resistant SympaTex® membrane makes leather shoes watertight on the outside but breathable on the inside. This provides a pleasant foot climate.

The models Tibet and Murnau are equipped with SympaTex® Membrane.

Colour black **Leather** Cordoba **Size** 39 - 47
 Lambskin lined

A warm lining made of cozy lambskin or natural wool provides excellent natural warmth in winter.

The soft material adapts perfectly to your feet and forms an insulating layer of air that warms wonderfully without making your feet sweat. Because of their natural function, lambskin and wool work as a climate control system that regulates the temperature and humidity. So bring winter on!

PREVENTION

Take the load off your feet

Sensitive pressure points are unpleasant and make walking and standing difficult. Therefore, after intensive research in collaboration with doctors and orthopaedic technicians, FinnComfort® has developed the prevention shoe.

These special FinnComfort® models are made of extra-soft leather. Additionally, our prevention shoes have no pressing seams but greater width and additional cushioning in the upper and instep.

Heel counters lengthened on both sides give your foot optimal guidance and ensure a natural rolling movement.

FINNORTHO

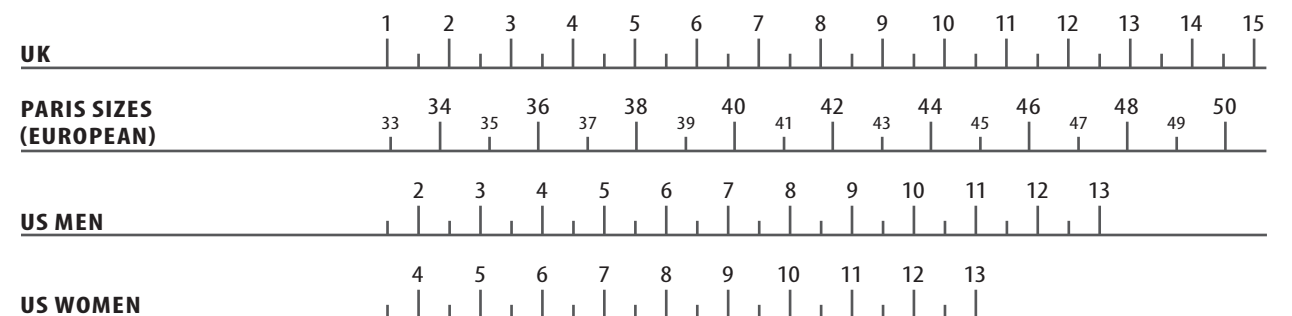

189 million people worldwide live with diabetes. When the disease is diagnosed too late or poorly controlled, it may lead to the possibility of developing Diabetic Foot Syndrome. Vascular and neurological abnormalities frequently damage the foot. Neuropathy, decreased blood circulation through arteries of the lower extremities, wounds that do not heal and even amputation of the foot are not uncommon in a diabetic. Well fitted and high quality extra-depth therapeutic walking shoes can help counteract this syndrome before foot ulcers occur or an amputation becomes imminent. If you suffer from repeated foot sores or have wounds increasingly difficult to heal, then FinnOrtho by FinnComfort® might be the perfect shoe for you.

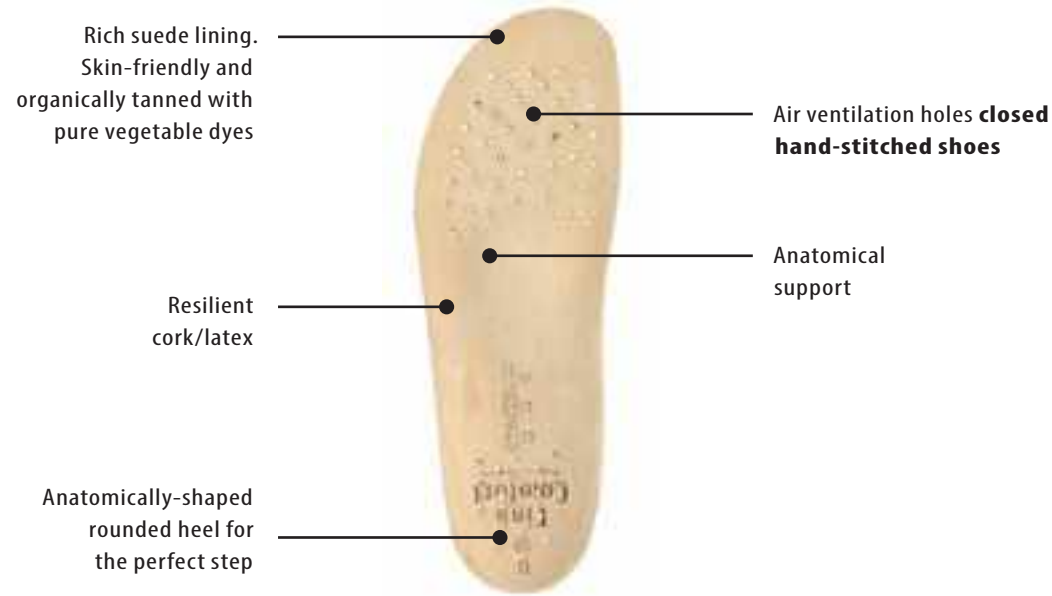

- 1 Anatomically designed, softly cushioned vamp** to protect toes and forefoot from pressure points
- 2 Seamless textile lining in the forefoot** is antiseptic, breathable and easy-to-clean
- 3 Wide opening** allows more room for easy foot entry
- 4 Cushioned collar and tongue for extreme comfort** prevents the danger of pressure sores
- 5 Extended heel counters** guarantee stability and heel motion guidance
- 6 Raised rear topline** reduces heel slippage, even with thicker insoles
- 7 Shock absorbing rocker sole** encourages a softer heel strike and smooth natural gait
- 8 Wide and level surface** for a secure and relaxed stand
- 9 Midsole/Optional reinforced rigid midsole** also available
- 10 Rocker tip** promotes the natural forwardrolling action

An ultra soft footbed with an antiseptic lining and stable support system is available upon request and sold separately. Thus protected and minimally stressed, wounds can heal and infections can be avoided.

Comparative Shoe Sizes

Special features

Long lasting and comfortable

Pleasant to wear thanks to padded topline

The anatomically formed, extremely comfortable footbed makes **walking comfortable**

Breathable thanks to finest leather lining

Flexible toecap eliminates pressure points

Foot motion guidance thanks to the solid heel counter

Every step is cushioned by the concave depression in the heel base and shock-absorbing materials in our outsoles

Air circulation and climate control thanks to ventilation channels in all closed hand-stitched shoes
